A. What was the most positive aspect of the way in which this instructor taught this course?

Sining was very concerned about the well-being & success of his students. Recognizing that English was not his first language and that there was a wide range & large amount of material he was required to disseminate, he actively gave students every avenue he could to help them succeed.

B. What can this instructor do to improve teaching effectiveness in the classroom?

Unfortunately, Sining's teaching style was formulaic, making it difficult to fully comprehend the material the first if you didn't understand it the first time around. Using different examples or other methods of teaching would make him significantly more effective.
